ends July 31st

Join us to discover the world's leader in the most ambitious life extension endeavor ever: CRYONICS. Learn about the cryopreservation process, the possibility of repairing cryopreserved individuals, and how present day technology and research are moving the industry forward. A compelling speaker lineup highlights the rich history of the cryonics industry, addresses religious and ethical considerations, and offers expert answers to your common questions.

Possibilities for living longer are also explored. Ever wonder whether regenerative medicine developed from stem cell technology can stop age-related diseases? Find out from Dr. Michael West of Advanced Cell Technology, a leading biotechnology firm making headlines around the world. Plus, gain inside information about the human aging experiment conducted at the Kronos Science Laboratory.

Registration includes all meals, a tour of the Alcor Foundation, and opportunities to make lasting friendships with Alcor members, supporters and staff. The next Alcor conference will not be until 2009, so don't miss this opportunity.

- [Caloric Restriction Workshop](#)

Are you interested in caloric restriction and its relevant research? Do you want to learn how to limit calories in pursuit of greater longevity? The [Caloric Restriction Society](#) is sponsoring a workshop in Tarrytown, New York, from August 10-12. The workshop will cover the newest scientific discoveries about the practice of caloric restriction and teach you how to incorporate the practice into your lifestyle. The workshop is a benefit for those who contribute to a milestone research project looking into the effects of calorie restriction on humans.

- [Cryonics in Newsweek](#)

Alcor and cryonics are discussed near the end of this [Newsweek article](#). We found mention of the information theoretic criterion of death particularly interesting.

- [Nanomedicine Support Continues in 2007](#)

Alcor is pleased to announce continuing support for development of theoretical nanomedical protocols and devices. For the third year, Robert Freitas, Jr. will receive a grant to continue his pioneering work in nanotechnology. Freitas has acknowledged Alcor's support in several peer-reviewed, published papers. He also has one additional peer-reviewed paper currently in press at J. Phys.Chem. A (slated for August 2007 publication) and four other peer-reviewed papers in various stages of completion -- all Alcor- supported -- that should be published sometime during 2007-2008.
